

Double WinPro10-20-10

N, P, K and Seaweed extract Compound Fertilizer

FEATURE & BENEFITS

- Rich in bioactive matter and organic component extracted from sargassum.
- Sharply increase macro-nutrients utilization ratio up to 60-70%
- Increase retention ability of soil, enlarge soil interspace, improve aeration condition
- It can replace some conventional fertilizers
- Improve the water and fertility retaining capacity of soil and adjust the nutrition release speed.

PHYSICAL DATA

Appearance	brown granular
pH	6.5-7.5
Particle size (2-4.0mm)	≥80%

GUARANTEED ANALYSIS

Nitrogen	10%
Phosphorous	20%
Potassium	10%
Moisture	≤5 %

Double Winpro 10-20-10 is a multi-functional compound fertilizer with total balanced ratio of Nitrogen, Phosphorous and Potassium formulation, which is suitable for balanced application particularly suitable for humid climate condition or alkaline soil due to being formulated with high organic matter. In addition, seaweed extract substance, which is soil conditioner, enhancer of nutrients uptake as well as micro-nutrients provider, can keep soil in high and stable fertility level to ensure crops grow vigorously.

RECOMMENDING APPLICATIONS

1. **Base Ground:** 4500-7500kg/ha.

2. **Top Dressing:** 300-450 kg/ha.

PACKAGE

Double WinPro 10-20-10 is available in 20kg/bag.
